HP PrintOS Print Beat

For HP PageWide Web Presses

Gain insights to continuously improve press performance

January 2017

Make day-to-day print operations more efficient, productive, and enjoyable with PrintOS Print Beat—a cloud-based print optimization solution that delivers historical data for better, faster decision-making and improved print operations.

Daily performance and high utilization

With HP PrintOS Print Beat you can now start making better, faster data-driven decisions with historical information and ubiquitous access to that data, for improvements based on your existing usage. Use Print Beat with your HP PageWide Web Presses to gain access to status updates virtually anytime, anywhere¹—web browser, or mobile device.

Track press and site performance

The HP Print Beat focuses on five key performance indicators (KPIs) that have a direct impact on press and site performance—print volume, pages per restart, operating efficiency, maintenance and system health. Detailed information on each of these KPIs provides in-depth visibility into production site operations—for one or multiple presses. Make informed decisions for improvements that increase efficiency and uptime—and ultimately, performance.

¹ The HP PrintOS Mobile Application is compatible with Android™ 4.0 or later and iPhone mobile digital devices running iOS 8 or later, and requires the press/printer and the smart phone to be connected to the Internet.

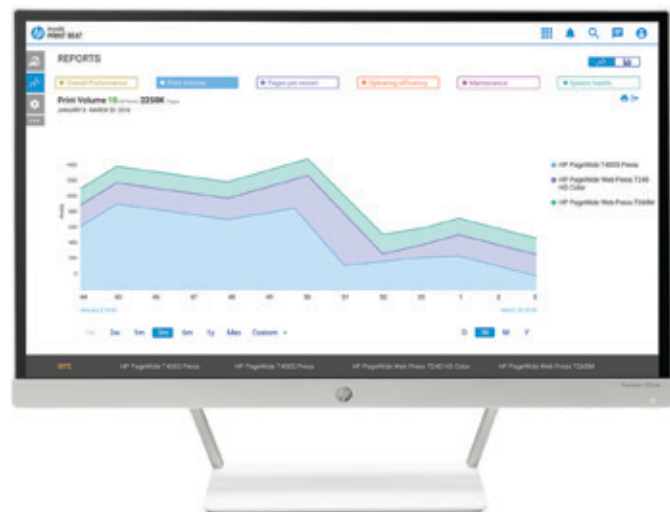

Continuous operational excellence

Key performance indicators provide in-depth visibility into production site operations, enabling quick action and opportunity for improvements.

Gain knowledge, drive improvements

Knowledge is power, especially if it means you're continually evolving and improving. HP PrintOS Print Beat enables you to leverage the information you need to do just that.

- Gain visibility—View historical data for full transparency and attention
- Generate greater insights—KPIs enable continuous operational improvements
- Increase control—Monitor and control status through your web browser or mobile app, anytime, anywhere¹
- Drive operational excellence—Benchmark press performance to make informed decisions that enhance operations and business opportunities

What's new?

- Print Beat gives you the option to add new sites in one account for specific site information and reporting.
- Print Beat allows for full detailed visibility of the next 10 jobs in the print queue.
- The Print Beat Shifts View dashboard enables you to analyze target performance according to your Shifts View settings and impressions target plan.

The HP PrintOS advantage

HP PrintOS is a print production operating system with a set of web and mobile apps that help you get more out of HP PageWide Web Presses while simplifying and automating production. With PrintOS you can continuously improve your operations, inspire your staff, and make better, faster decisions. Use PrintOS to manage any number of jobs from submission to shipment, to collaborate with industry partners and colleagues, and discover new opportunities for growth. Access the open and secure cloud-based PrintOS virtually anytime, anywhere.¹

¹ The HP PrintOS Mobile Application is compatible with Android™ 4.0 or later and iPhone mobile digital devices running iOS 8 or later, and requires the press/printer and the smart phone to be connected to the Internet.
