January 2017

Protect your agency with industry-leading security.

From PCs to printers—HP has security built-in.

Get protection at every level for your agency. Choose HP PCs to help protect your data, devices, and identity. Features such as biometric security and SmartCards work to keep threats at bay. HP Elite PCs include exclusive HP Sure Start with Dynamic Protection,¹ providing self-healing BIOS-level protection.

Your printer handles sensitive information, which is why HP gives you comprehensive control and allows you to manage security with ease. Safeguard devices, data, and documents with a top-tier suite of HP security features and solutions.

Choose HP for your agency's first line of defense—now at lower prices on your CB24 contract.

Notebooks

HP Pro Notebooks: Feature rich and performance ready

¹ Dynamic Protection is available on select Intel® based HP Elite products.

² Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See <http://www.windows.com>.

³ Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of higher performance.

⁴ Maximum memory capacities assume Windows 64-bit operating systems. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.

⁵ For storage drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 16 GB (for Windows 7) and up to 36 GB (for Windows 8.1 and 10) of system disk is reserved for system recovery software

⁶ HD content required to view HD images.

⁷ Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited.

⁸ Service levels and response times for HP Care Packs may vary depending on your geographic location. Restrictions and limitations apply. Service starts at date of hardware purchase. For details, visit hp.com/go/cpc.

⁹ MIL STD 810G testing is pending and is not intended to demonstrate fitness for U.S. Department of Defense contract requirements or for military use. Test results are not a guarantee of future performance under these test conditions. Damage under the MIL STD test conditions or any accidental damage requires an optional HP Accidental Damage Protection Care Pack.

¹⁰ The world's most secure printers and deepest level of security: Based on HP review of 2015 published embedded security features of competitive in-class printers. Only HP offers a combination of security features for integrity checking down to the BIOS with self-healing capabilities. Available on the HP LaserJet M527, M506, M577 and as an upgrade on the M552, M553, M604, M605, and M606. Some features will be made available as a HP FutureSmart service pack update on selected existing Enterprise printer models.

¹¹ Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups.

¹² Measured using ISO/IEC 24734, excludes first set of test documents. For more information, see hp.com/go/printerclaims. Exact speed varies depending on the system configuration, software application, driver, and document complexity.

¹³ HP PageWide TCO: TCO comparison based on 90,000 pages for PageWide Pro and 150,000 pages for PageWide Enterprise, manufacturers' published specs for page yields and energy use, MSRP for hardware and supplies, and cost per page based on ISO yield with continuous printing in default mode with highest-capacity cartridges. Comparisons are to color business printers and MFPs \$300-\$1000 as of Sept. 2015 and color business A4 MFPs \$500-\$3000 as of Nov. 2015, excluding products with 1% or lower market share. More at hp.com/go/learnaboutsupplies.

¹⁴ HP PageWide speed: Comparison based on manufacturers' published specifications of fastest available color mode of all color business printers \$300-\$600 USD and MFPs \$400-\$800 USD as of November 2015, excluding other HP PageWide products, and products with 1% or lower market share using market share as reported by IDC as of Q3 2015. HP PageWide speeds based on General Office mode and exclude first page. Learn more at hp.com/go/printerspeeds. For PW Pro 400/500 series: Comparison based on manufacturers' published specifications of fastest available color mode of all color business printers \$300-\$800 USD and MFPs \$400-\$1,000 USD as of November 2015, excluding other HP PageWide products, and products with 1% or lower market share using market share as reported by IDC as of Q3 2015. HP PageWide speeds based on General Office mode and exclude first page. Learn more at hp.com/go/printerspeeds.

¹⁵ HP PageWide energy efficiency: Energy claim based on the HP PageWide Technology array life cycle assessment (LCA) results. LCA of HP PageWide Technology array commissioned by HP and conducted by PE International as of February 2016.
