

HP Army ADMC-2 Consolidated Buy 25

DRAFT

HP Army Desktop and Mobile
Computing Contract
W91QUZ-06-D-0004

The world's most secure PCs and Printers^{1,2}

From PCs to printers—HP has security built-in.

Get protection at every level for your agency. Choose HP PCs to help protect your data, devices, and identity. Features such as biometric security and SmartCards work to keep threats at bay. HP Elite PCs include exclusive HP Sure Start with Dynamic Protection,³ providing self-healing BIOS-level protection.

Your printer handles sensitive information, which is why HP gives you comprehensive control and allows you to manage security with ease. Safeguard devices, data, and documents with a top-tier suite of HP security features and solutions

Choose HP for your agency's first line of defense—now at lower prices on your CB25 contract.

Order today! Prices are only effective through September 30, 2017.

¹ "World's most secure PCs" claim is based on HP's unique and comprehensive security capabilities at no additional cost among vendors with >1M unit annual sales as of November 2016 on HP Elite PCs with 7th Gen Intel® Core® Processors, Intel® integrated graphics, and Intel® WLAN.

² "World's most secure printing" claim is based on HP review of 2016 published security features of competitive in-class printers. Only HP offers a combination of security features that can monitor to detect and automatically stop an attack then self-validate software integrity in a reboot. For a list of printers, visit: www.hp.com/go/PrintersThatProtect.

³ Dynamic Protection is available on select Intel® based HP Elite products.

⁴ MIL STD 810G testing is pending and is not intended to demonstrate fitness for U.S. Department of Defense contract requirements or for military use. Test results are not a guarantee of future performance under these test conditions. Damage under the MIL STD test conditions or any accidental damage requires an optional HP Accidental Damage Protection Care Pack.

⁵ Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See www.windows.com.

⁶ Multi Core is designed to improve the performance of certain software products. Not all customers or software applications will necessarily benefit from the use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of higher performance.

⁷ Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.

⁸ For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 16 GB (for Windows 7) and up to 36 GB (for Windows 10) of system disk is reserved for system recovery software.

⁹ HD content required to view HD images.

¹⁰ Wireless access point and Internet service is required and is not included. Availability of public wireless access points limited.

¹¹ Service levels and response times may vary depending on your geographic location. Service starts on date of hardware purchase. Restrictions and limitations apply. For details, visit www.hp.com/go/cpc.

¹² Due to the non-industry standard nature of some third-party memory modules, we recommend HP branded memory to ensure compatibility. If you mix memory speeds, the system will perform at the lower memory speed.

¹³ Duplication of copyrighted material is strictly prohibited. Actual speeds may vary. Double Layer media compatibility will widely vary with some home DVD players and DVD-ROM drives. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 Double Sided-Version 1.0 Media.

¹⁴ Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups.

¹⁵ Measured using ISO/IEC 24734, excludes first set of test documents. For more information see <http://www.hp.com/go/printerclaims>. Exact speed varies depending on the system configuration, software application, driver, and document complexity.
