Standard warranty and service definitions:

Service Extension: Allows customers to extend service coverage of products to match the expected length of time they will be used. Service is available for 2, 3, 4, or 5 years on most products.

Pick Up & Return: An HP authorized courier will pick up the defective product at the Customer's location, if the pickup location is within the geographic location where the service will be provided, and deliver it to the HP designated repair center. It is the Customer's responsibility to appropriately package and prepare the product for courier pickup. Service requests must be received before 12:00 p.m. local time to activate same-day pickup. All other service requests will be scheduled for next business day pickup.

Next Business-Day Onsite Response (NBD): Provides faster response time for customers who want to reduce downtime on units experiencing technical problems. For issues that cannot be resolved remotely, an authorized HP Services representative will arrive onsite the next business day after a call that falls within a contracted service window has been logged. HP returns covered hardware to operational condition, repairing or replacing components or entire units as necessary. Coverage includes all required parts, materials and labor.

Accidental Damage Protection (ADP) G2: Helps avoid repair or replacement costs due to mishaps that occur during normal operation of devices. Accidental damage includes liquid spills, drops, falls, collisions, electrical surges, or any unintentional breakage that renders the unit inoperable. Accidental Damage Protection service will usually be delivered in the same manner as standard service—Onsite or Pick Up & Return. ADP G2 offers limited coverage for claims up to the value of the purchase price of the covered system or one replacement unit.

Defective Media Retention (DMR): DMR allows customers to retain their malfunctioning hard drive while their defective drive is replaced. DMR gives customers control over sensitive and confidential data, and allows them to determine the best method of disposal for failed hard drives. This service assists customers with the requirements of Sarbanes-Oxley, HIPAA and Gramm-Leach Bliley Act standards.

Battery Replacement Service: One Time Battery Replacement Service offers three convenient methods for replacing out-of-warranty batteries: Self-Replacement Service, Offsite Return Service, and Onsite Service. Under each option, one (1) replacement battery will be provided if the originally purchased battery drops below 50% charge capacity during normal use or if a cell failure has occurred before the 50% limit is reached.

Absolute: Absolute® is an adaptive endpoint security solution built into the core of HP devices. It provides you with a persistent connection to all of your endpoints and the data they contain. This means you're always in control, even if a device is off the network or in the hands of an unauthorized user. Your connection to each device provides you with the insight you need to assess risk and apply scenario-appropriate security measures.

Post Warranty Service: Allows customers whose warranty is about to expire, or has already expired, to continue service delivered under warranty or Care Pack. Service can be extended for another year.

- Unit must be in good operating condition.
- Coverage starts at Warranty or Care Pack end date or if purchased up to 30 days after expiration, at time of registration.
- May be sold 90 days before Warranty/Care Pack expiration but not at time of hardware sale.
- Product must have more than 1 year of service life (parts support) left in order to sell post warranty options.
- Post Warranty Care Packs cannot be "stacked". (For example, a 5 year NBD Onsite Care Pack may not be sold with and at the same time as a 1 year Post Warranty Care Pack to try to entitle the hardware for 6 years).

With every Care Pack purchase, customers get Onshore Support assistance from knowledgeable technical experts.
