

HP Black 4500 Bulk Supply

High-optical density ink that produces superior print quality with minimal intervention and cost

Target customers

Ideal for companies that produce larger print runs and have a need for a higher-volume ink delivery system that can be used without bulk hardware.

Applications

- Mail addressing
- Product identification coding and marking

Key highlights

- An Original HP ink cartridge designed to maintain consistent, reliable performance
- Low cost per print helps reduce production overhead
- Dark black, high-optical density ink for use in high-speed applications
- High-quality output on porous media
- High-resolution, 600 dpi printing on uncoated substrates

HP Black 4500 ink is a water-based pigment ink with high-optical density. HP bulk supply brings convenience and high-quality printing to industrial markets that require a low cost per print in a stand-alone, gravity fed cartridge and ink supply that can be used without bulk hardware. Available in a 370 ml bulk supply for ease of use for high-volume applications that require high-quality results with low intervention rates.

Experience high-quality printing

Available in a bulk ink delivery system for high-volume applications that require high-quality results at low cost per print, and infrequent ink supply intervention. Maintain consistently high print quality and productivity with this high-performance, high-optical density Original HP ink. Achieve consistent, high-resolution 600 dpi print quality with cost-effective HP Thermal Inkjet technology.

Maintain consistent, reliable printing

With an integrated cartridge design you get a fresh printhead with each cartridge replacement, enabling high system reliability without expensive maintenance and servicing. You can print faster and still retain sharp, dark black text and high-optical density.

Achieve operational efficiency

Save time, improve productivity, and lower operating costs with HP Thermal Inkjet bulk supplies. The HP bulk ink delivery system is ideal for high-volume applications that require high-quality results at low cost per print, and infrequent ink supply intervention. The large ink supply and easy replacement reduces downtime so print volume is increased.

Technical specifications

Ink type	Original HP pigment ink
Resolution	Up to 600 dpi
Nozzle count	300
Print swath	12.7 mm (0.5 in)
Maximum firing frequency	Up to 12 kHz
Average drop volume	33 pl
Average delivered ink	370 ml (12.5 oz)
Number of electrical interconnect pads	52
Operating conditions	Temperature: 10° to 40°C Humidity: 10 to 80% RH
Shipping/storage conditions	Altitude: up to 5000 m Cartridge orientation: Stored on its side, horizontal
