<sup>1</sup> There is an issue with the IDT Audio driver after upgrading from Build 1607 to 1703 where all audio input enhancements are disabled. Users can update the driver from Windows Update prior to the upgrade (or after the upgrade) to fix this issue.

<sup>2</sup> The Intel Rapid Storage Technology application will not launch when upgrading to Windows 10. Users can fix this by visiting HP.com and updating their Windows 10 driver which will reinstall the application.
