

HP Device as a Service

Analytics and Proactive Management

Key benefits

- Analytics and insights that help you better manage device fleets and proactively optimise performance.
- Enhanced and Premium plans include an experienced Service Agent to proactively monitor and address issues before they occur.

DaaS Analytics and Proactive Management capabilities are available exclusively through DaaS agreements via HP or an Authorised Reseller.

Overview

Whether it's deploying new technology or making updates, IT managers have a lot on their plates. Often, as their bandwidth gets shorter, the amount of downtime grows longer.

HP Device as a Service (DaaS) plans with Analytics and Proactive Management capabilities provide a solution to this problem in a premium service experience. Predictive analytics help you boost productivity, while regular reporting and a consolidated dashboard help you track usage and stay on top of updates. Now, you can leave the monitoring and support of your devices in the capable hands of our proactive agents. Their expert assistance and cutting edge technology tools help to proactively anticipate problems and fix them before they even occur—freeing up your IT manager to focus on other more pressing issues.

IT and user advantages

Get insightful and actionable analytics to improve productivity

Improve IT efficiency with analytics,¹ proactive management,² and inventory and health monitoring that identify and predict alerting conditions.

Optimise performance for your entire fleet

Put asset inventory and health monitoring on auto-pilot. With HP DaaS, you can prolong the life of your investments and be alerted while we take preventative action before there is a problem.

Have a security guard that's always on duty

Get multi-layered, enterprise-class security from malware protection, real-time policy violation and firewall, and antivirus disruption alerts, plus find, lock, and erase.³

Offload IT tasks so you can focus on what impacts the business most

Let HP take care of day-to-day management tasks and reduce time supporting users so you can focus on projects that move your business forward.
