Analysis done by HP and is based on published information from websites, date sheets, brochures of leading competitive brands and representative in-class devices. Information provided is to the best of our knowledge.

Notes

[1] "World's most secure scanning" claim is based on an HP review of 2017 published security features of competitive in-class enterprise scanners. Only HP offers a combination of security features that can monitor to detect and automatically stop an attack then self-validate software integrity in a reboot.
