HP MPS solution simplifies multi-location print management

## Business Need

- Gain control over print environment in multi-location company
- Reduce printing costs through centralized management
- Remove print management duties from local stations

## HP Solution

- Deploy HP Managed Print Services

## Client Outcome

- Centralized software remotely monitors networked HP printers to generate toner alerts and collect data on print usage
- Centralized management and purchasing streamlines costs, adds efficiencies
- Toner alerts ensure timely supplies ordering and delivery
- Accurate statistics on print usage enables ongoing optimization of the print fleet

# Media General

“We immediately found that HP MPS was more responsive in managing our whole print environment. For the first time, we have reliable data on printing. We know print volume by printer and how much we’re spending. The reporting is amazing.”
