

HP PC Hardware Diagnostics Windows: more information

- You can find Windows Diags from the start menu in HP Help and Support or through HP Support Assistant on your PC.
- Simply clicking the HP Hardware Diagnostics Windows Logo will get you in.
- System Tests - Check the PC's hardware to assure everything is functioning properly. If your system won't boot into Windows, you will need to run UEFI, (see instruction on UEFI page).
- Component Tests – Select individual tests focused on selected hardware components in your PC.

NOTE: If you need to stop a diagnostic test at any time, select Cancel.
