

HP MPS makes faster printing with protection from security attacks

HP integrated solution delivers high performance, secure printing

Industry

Financial Services

Objective

Fast printing with protection from manipulation and attacks

Approach

Compared solutions from different suppliers before deciding on an all-HP concept including the HP Color LaserJet Managed Flow MFP E87660z

IT matters

- Enables the bank to manage the IT security of its entire printer fleet centrally
- Improves uptime with high device availability and call-to-repair SLA of either one day or within six hours

Business matters

- Prints a 50-page loan agreement in less than a minute
- Provides a high level of protection against external attack and device manipulation
- Enables staff to scan documents directly into their department's folder
- Conforms with BaFin MaRisk regulations

“With HP JetAdvantage Security Manager, we can rest assured that we have a secure printer fleet that meets the banking industry’s regulatory requirements in terms of risk management. Add in the SafeCom software and we are well ahead of the game with regard to security technology. This is extremely important for us as printers are a key component in our core business processes.”

– Herbert Bayerl, IT project manager, Münchener Hypothekbank

More productive and secure printing

MünchenerHyp has made its printer fleet more productive and secure with an HP solution. The majority of its devices are now the HP Color LaserJet Managed Flow MFP E87660z, all of which are fitted with SafeCom and HP JetAdvantage Security Manager software.

Challenge

Managing 7.5 million printed pages

MünchenerHyp’s printer fleet had come to the end of its lifecycle. The bank currently prints 7.5 million pages per year and was looking for new devices that could meet its increased requirements with regard to performance and security.

Solution

HP Color LaserJet Managed Flow MFP E87660z with security software

MünchenerHyp opted for a refresh to its printing fleet by purchasing HP Color LaserJet Managed Flow MFP E87660z devices and an HP Managed Print Services (MPS) contract. HP Web Jetadmin supports print management to install, track and maintain the operational capability of the printers while HP JetAdvantage Security Manager meets the banking industry’s regulatory requirements in terms of risk management.

Benefits

Multifunction devices ensure high productivity and secure printing

MünchenerHyp can print 60 pages per minute and keep up with the high volume of print securely. HP JetAdvantage Security Manager software ensures that a device is restarted automatically in the event of an attack or an anomaly.

“We really put it through its paces. At one point we sent 1,000 pages to the printer at once with many of them set to be stapled. It convinced us that the HP Color LaserJet Managed Flow MFP E87660z had the potential to be our new workhorse. It met our high productivity requirements. Even with the high print volumes, it didn’t stop to buffer between jobs as many other devices do.”

– Herbert Bayerl, IT project manager, Münchener Hypothekbank
