## Gain efficient digital production

- This printer fits right into your workflow—print with digital technology with no need to resize your rolls.
- Print on jumbo rolls up to 1.2 tons and 47-inches diameter and benefit from automatic skew compensation.
- Monitor your HP Latex printer in-plant and online with HP PrintOS applications.

## Ramp up your production of digital décor

- Expand your design portfolio while reducing inventory by printing batches on-demand.
- Avoid expensive analog set-up costs as well as repetitive patterns and easily create customized short runs.
- Maximize uptime with this smart printer for proactive and preventive services.

<sup>1</sup> Based on a comparison of HP Latex Ink technology to competitors with leading market share as of December, 2013 and analysis of published MSDS/SDSs and/or internal evaluation. Performance of specific attributes may vary by competitor and ink technology/formulation. Print shops/print service providers must seek certifications and eco-labels directly with certifying bodies. HP does not imply or grant certification or ecolabels to print shops/PSPs nor does it support individual customer processing of such certifications.

### Eco Highlights

- Better for print operations—no hazard warning labels or HAPs, no localized ventilation needed<sup>1</sup>
- Better for the end-customer, more differentiation—odorless prints<sup>2</sup> go where solvent, UV can't
- Better for the environment—HP designs end-to-end sustainability into large-format printing
- HP Latex Inks—UL ECOLOGO®/UL GREENGUARD GOLD Certified<sup>3</sup> and ECO PASSPORT certified<sup>4</sup>

<sup>1</sup> Contains no Hazardous Air Pollutants according to EPA Method 311. Localized ventilation equipment (air filtration) is not required to meet U.S. OSHA requirements. Localized ventilation equipment installation is at the discretion of the customer—See the Site Preparation Guide for details. Customers should consult state and local requirements and regulations.

<sup>2</sup> There is a broad set of media with very different odor profiles. Some of the media can affect the odor performance of the final print.

<sup>3</sup> UL ECOLOGO® Certification to UL 2801 demonstrates that an ink meets a range of multi-attribute, lifecycle based criteria related to human health and environmental considerations (see [ul.com/EL](http://ul.com/EL)). UL GREENGUARD GOLD Certification to UL 2818 demonstrates that products are certified to UL's GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit [ul.com/gg](http://ul.com/gg) or [greenguard.org](http://greenguard.org).

<sup>4</sup> Original HP Latex Inks for the HP Latex 3800 Jumbo Printer are certified ECO PASSPORT by Oeko-Tex,® which is a globally uniform testing and certification system for textile chemicals, colorants, and auxiliaries. It consists of a two-step verification procedure that analyzes whether the compounds and each ingredient meet specific criteria for sustainability, safety, and regulatory compliance.
