With every Care Pack purchase customer gets Onshore Support, assistance from knowledgeable technical experts.

Standard warranty and service definitions:

Accidental Damage Protection (ADP) G2: Helps avoid repair or replacement costs due to mishaps that occur during normal operation of devices. Accidental damage includes liquid spills, drops, falls, collisions, electrical surges or any unintentional breakage that renders the unit inoperable. Accidental Damage Protection service will usually be delivered in the same manner as standard service—Onsite or Pick Up & Return. ADP G2 offers limited coverage for claims up to the value of the purchase price of the covered system or one replacement unit.

DaaS Proactive Management: As part of HP Device as a Service (DaaS), the device health analytics and proactive endpoint management capability provided by HP places comprehensive data, reports and insights at the Customer's fingertips. DaaS, which is cloud-enabled for scale and flexibility, continually monitors the fleet and reports device problems, or potential problems and alerts the HP Service Experts so they may take the appropriate steps to ensure device uptime.

Limitations to DaaS Proactive Management:

- DaaS Proactive Management may only be sold as part of a DaaS Plan.
- Only supports standard Windows OS, iOS or Android. Does not support Linux OS or POS Ready OS.
- For hardware products not listed on this reference guide, engage DaaS Services Sales Specialist for guidance.

Setting Customer expectations for DaaS Proactive Management:

- Onboarding **MUST** occur after the Care Pack sale.
- Customer email address is **MANDATORY** in every order to ensure onboarding may occur.
- Customer should receive an email within 5 business days of order placement which will guide them thru onboarding process.

Defective Media Retention (DMR): DMR allows customers to retain their malfunctioning hard drive while their defective drive is replaced. DMR gives customers control over sensitive and confidential data, and allows them to determine the best method of disposal for failed hard drives. This service assists customers with the requirements of Sarbanes-Oxley, HIPAA and Gramm-Leach Bliley Act standards.

Next Business-Day Onsite Response: Provides faster response time for customers who want to reduce downtime on units experiencing technical problems. For issues that cannot be resolved remotely, an authorized HP Services representative will arrive onsite the next business day after a call that falls within a contracted service window has been logged. HP returns covered hardware to operational condition, repairing or replacing components or entire units as necessary. Coverage includes all required parts, materials and labor.

Optional Customer Self Repair (CSR) Part Service:

'Mandatory CSR' is part of the standard warranty associated with some products. For customers with a Care Pack, CSR is optional. 'Optional' allows the customer to either perform CSR or choose to have HP service personnel (either via depot repair or onsite engineer, depending on Care Pack service level purchased) perform the replacement at no additional charge during the product service coverage period.
