

# Uncover opportunities to improve workflow efficiencies

## HP Immersive Analytics Service

### What if you could...

- Help drive down print costs while improving efficiency and mitigating risk?
- Pinpoint inefficient processes to help reduce printing, copying, and manual routing?
- Compare your teams' current print behaviours with typical printing habits?
- Make informed decisions based on your organisation's actual workflows?
- Identify opportunities to accelerate digital transformation?

---

## With HP Immersive Analytics Service—you can.

### The challenge

Inefficient workflows create bottlenecks that slow down progress. If your teams use paper- and people-intensive processes to manage documents, then time and resources are being wasted every day.

One workgroup may be printing far more than needed. Another could be making many more daily trips to the copier than their peers. Or, users may habitually copy documents for distribution instead of sharing digital files.

Getting visibility into *where*, *why*, and *how* inefficiency happens can be difficult and time-consuming. That means that opportunities to improve workflow processes can be easily overlooked.

### The solution

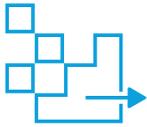

HP Immersive Analytics Service combines powerful analytic tools with our expertise in efficiency strategies to produce a holistic view of your printing and imaging environment.

HP uses data about how your teams actually print, copy, and scan to discover actionable ways to improve efficiency—and to help reduce risk.

By working with an HP Analytics Consultant, your organisation can quickly find recurring user behaviours that suggest inefficiencies. This analysis of data can lead to prioritised strategies for workflow efficiency.

## How HP Immersive Analytics Service works

### Share data

The organisation shares job accounting data, organisational information, and user data with their HP advisor. Data is protected in accordance with all applicable privacy and data protection laws worldwide.

### Analyse

The HP advisor analyses the organisation's data to find opportunities for greater efficiency. Scope, sample size, and study length vary based on client choice.

### Report

The HP advisor shares conclusions with stakeholders. Findings cover actionable items and insights into the organisation's normal workflow.

### Strategise

HP can work with the organisation on efficiency strategies, as well as help stakeholders implement solutions to achieve goals.

#### Client experience

**Problem:** One department seemed to be doing a lot of printing, but leadership lacked visibility into what was being printed and why.

**HP action:** The HP Immersive Analytics Service identified one team that printed 27 times more than other teams. More than 36% of the volume came from two recurring high-page-count print jobs.

**Results:** HP helped leadership to pinpoint processes that were costing them hundreds of thousands of pages and significant time manually routing documents every year. The department now saves time and paper by using more efficient digital workflow processes.

#### Take the burden off leadership and IT

By turning to the HP Analytics Consultants, stakeholders can keep their focus on their core competencies.

HP advisors have the tools and expertise to sift through your organisation's data and look at it from a process-efficiency standpoint.

#### Zero in on inefficiencies

Get a more accurate and holistic view of your print environment. Use the HP Immersive Analytics Service to discover:

- High-frequency paper-centric behaviours
- Repetitive, labour-intensive tasks
- How teams' habits compare to typical usage patterns
- Recurrent vulnerabilities introduced by poor document control

Your HP Analytics Consultant can help you identify inefficient patterns and repetitive tasks—the first step toward improving workflows and accelerating digital transformation.

#### Prioritise findings

Once the HP Analytics Consultants have isolated potential inefficiencies affecting your teams' document workflows, they will present you with their findings. This insight from HP can help you determine which printing, copying, or scanning behaviours merit further investigation, so you can address inefficiencies with confidence.

#### HP can help

When it's time to move forward, HP can partner with you to improve efficiency. HP industry consultants can bring your organisation a wealth of knowledge about effective strategies and solutions for reducing print and copy costs while moving toward a digital workflow.

As a long-standing leader in printing solutions and process efficiency, HP offers reliable solutions, constant innovation, and deep expertise.
