

PIXO VR FAQ

EVOLVE YOUR WORKFORCE: PIXO VR FAQs.

Answers to frequently asked questions about Virtual Reality Training
from PIXO VR.

PIXO VR creates VR Training experiences for enterprise that unlock human potential. Our AAA-game quality environments and behavior-changing narratives improve recall accuracy & performance while reducing mistakes, costs, and risk.

Learn. More. with PIXO VR.

1.

Q: CAN MULTIPLE PEOPLE TRAIN AT ONCE?

Yes! That's one of the key differences between PIXO VR Training and other training experiences. Our groundbreaking multi-user functionality enables up to dozens of employees to train simultaneously — from anywhere in the world — all in the same virtual environment. Need to train more? Just add another room.

Q: CAN LESSONS BE REPEATED?

Yes — but more importantly, they can also be randomized. That's another feature that makes PIXO VR Training unique. To avoid “teaching to the test”, we can expose trainees to literally millions of randomized scenarios and hazards.

Q: I TRIED VR ONCE AND IT MADE ME FEEL SEASICK - WILL YOURS?

The short answer: No. Premium PIXO VR Training modules run at an industry-best 90 FPS (frames per second), which greatly reduces the potential for motion sickness. Inferior frame rates produce what's called “lag”, confusing the human brain as to what it's experiencing and resulting in that queasy feeling.

Q: CAN EXISTING PRODUCTS BE CUSTOMIZED TO MY NEEDS?

Yes! Our VR Training experiences are specifically built with customization in mind. Everything from protocols, to work environments, to simulated real-world tools and equipment can be personalized for your business' needs and those of your workforce.

Q: HOW MUCH DOES IT COST? IS IT REALLY EXPENSIVE?

Actually, experiences from our growing content library start at just \$475/mo. However, we also do fully custom VR work, which can increase cost due to the need for highly personalized design and instructional narrative.

Q: DO YOU OFFER ANY SORT OF TRIAL?

Yes! We offer several trial packages. Please contact a PIXO VR sales representative to learn more.

Q: WHAT HARDWARE IS NEEDED TO RUN YOUR VR TRAINING?

PIXO VR software can be run on a variety of popular VR hardware platforms. Our experiences run optimally on the HP Windows Mixed Reality Headset and tetherless HP Z VR Backpack. PIXO VR customers may be eligible to receive exclusive deals on HP VR hardware.

Q: WHAT ARE THE HARDWARE REQUIREMENTS FOR PIXO VR TRAINING?

Please refer to the chart below for details.

Component	Minimum Specification	Recommended Specification
CPU	Intel® i5-4590 / AMD FX 8350 equivalent or greater	Intel® i7-7700 / AMD Ryzen 1700 equivalent or greater
RAM	4 GB DDR3 RAM	8 GB DDR4 RAM
GPU	NVIDIA GeForce GTX 1060 (please note ATI cards not currently supported)	NVIDIA GeForce GTX 1070 or greater (please note ATI cards not currently supported)
HDD	6GB of Storage on a 7200 RPM Drive	8 GB of Storage on a SSD/M.2 Drive
NETWORK	Internet Connection Required	Broadband Internet Connection Required for Multi-User Applications
