

Transition From Your Old Technology

Ease your transition from old to new

Every day, higher education institutions are managing some sort of technology transition. You're experiencing it and so are your peers. Slower, older workplace devices may be standing in the way of organization's and students' productivity and satisfaction. Budget challenges and too many priorities may be impeding your ability to upgrade.

With innovation comes transition. We want to make it easy for you. Do you need help that you can trust to safely and securely remove your old equipment. Whatever your circumstances, we have transition solutions that can help you make the move faster and easier.

HPFS Contact:

Trade in your old devices with the potential to get cash back

Trade-in your older devices, any brand, with the potential to recover value through cash back from resale. We will evaluate your equipment's value based on current market demand. Once processed, you can apply the proceeds towards new HP solutions.

Returns can be easy with our pack and ship services. Your support staff will have more time to focus on other priorities. Our sales representatives and channel partners can help you start the process.

Equipment removal and value recovery

For larger projects, retiring your old devices in a secure, compliant, and environmentally friendly manner can be a complex process. We can help simplify your efforts. We offer equipment recovery solutions that help you manage your IT equipment on a one-time or on-going programmatic basis.

Security auditing and data cleansing—We are committed to maintaining your organization's credibility and security. Depending on your specific requirements, we help you ensure secure data removal and adherence to regulations. This can be completed in our facilities or at your site.
