

HP ThinPro

OVERVIEW

HP ThinPro is a Linux-based thin client operating system that allows users to gain resources from the cloud, server based computing, client virtualization and terminal emulation environments. HP ThinPro offers flexible configuration options and can be configured to function in Smart Zero mode.

To find out more about ThinPro, click here: www.hp.com/go/thinpro

AT A GLANCE

- Simple GUI interface
- Combination of both ThinPro and Smart Zero Core
- Firefox web connection
- RDP, Citrix or VMWare Connection
- TeemTalk terminal emulation
- HP Velocity
- Management via HP Device Manager or Smart Client Services.

Support Platforms

Supported platforms HP t420, HP t430, HP t520, HP t530, HP t20, HP t628, HP t630, HP t730, and HP mt21

SOFTWARE COMPONENTS

GUI Interface	Simple GUI interface driven via option Connection Manager to configure multiple connections. Smart Zero Mode, supports only 1 connection at a time. Additional customization can be done to the GUI for an optimal end user experience
Combined ThinPro and Smart Zero Core	Change between ThinPro and Smart Zero core via a selectable option in the Customization Center
Connections	Create Connections for Users to access resources. ThinPro comes pre-installed with Firefox, RDP, Citrix, VMWare, TeemTalk, SSH, XDMCP, Telnet and Customer. Other connections are available via Add-Ons.
Taskbar	Customize the location and content of the HP ThinPro Taskbar. Show the clock, power button, active connection, Connection manager, Control Panel and Information Dialogue

Overview
