

# HP 3D Capture Stage

The 3D Capture Stage was designed specifically for Sprout by HP to make the 3D scanning process even better. The motorized turntable eliminates the need to manually turn objects, which makes scans faster and more consistent. It connects automatically with Sprout's 3D Capture app to create an even simpler way to produce high-quality scans.

### **3D scanning, simplified**

- Place an object on the 3D Capture stage. Hit scan. Watch it work. The turntable connects to Sprout's 3D Capture app to automate a full 360-degree scan, so you can go grab a cup of coffee and your scan will be waiting for you when you get back.

### **Great results the first time, every time**

- Together with Sprout, the 3D Capture stage helps you produce consistently amazing scans. Rubberized magnetic blocs ensure your object stays in place as it is automatically rotated and captured in just the right position.

### **Capture every detail**

- With 3D Capture stage you're covered from all angles. The turntable was designed to maximize surface area coverage by automatically tilting 15-degrees as it rotates, making sure all aspects of your project are captured beautifully.

## HP 3D Capture Stage

<b>Compatibility</b>	With Sprout by HP only
<b>Dimensions</b>	Out of Package: 40 x 200 x 200 mm Packed: 255 x 237 x 72 mm
