### Product Limitations:

- The object being scanned must fit on the mat in the volume of light emitted by the projector - approximately 12 inches by 16 inches on the mat and decreasing toward the projector.
  - Objects that are reflective, transparent, have very uneven textures such as fur, are very dark in color, or are highly symmetrical do not scan well.
  - HP 3D Capture Stage is not intended for users needing precision scans such as for product design or creating museum-quality scans, amongst others.
-
