<sup>2</sup> Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of higher performance. <sup>3</sup> Full high-definition content is required to view (FHD) images. <sup>4</sup> USB Type-C™ and USB-C™ are trademarks of USB Implementers Forum. <sup>17</sup> Unlimited access to Universal Music's portfolio for 12 months, free to HP customers. See <http://www.microsoft.com>. <sup>6</sup> Full high-definition (FHD) content is required to view FHD images. <sup>7</sup> Performance is sequentially faster (read-only) compared to traditional HDD.
