

# HP HD Pro 42-in scanner HP SD Pro 44-in scanner

NEW Software Update

Irene Boixareu/ July, 2016

# What's new in July's software release of HP HD/SD Pro scanners?

1

Manual Roll selection

2

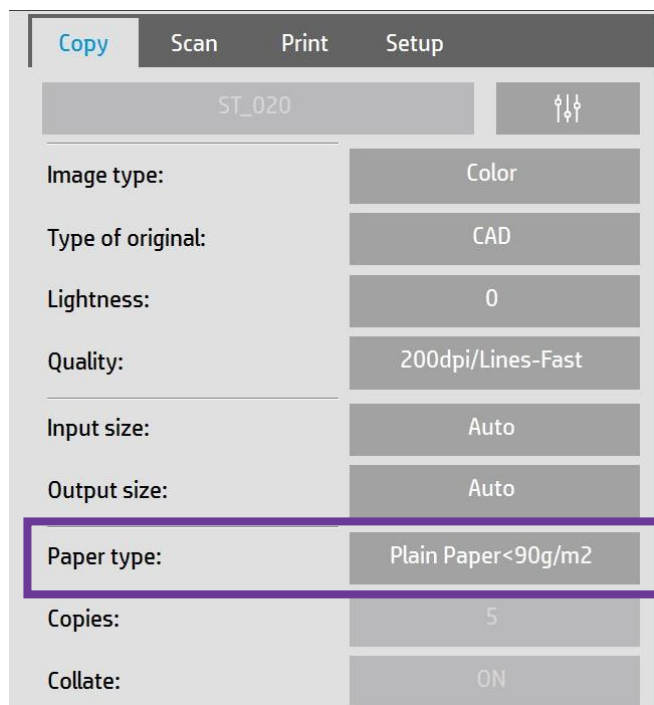

Alignment feature

3

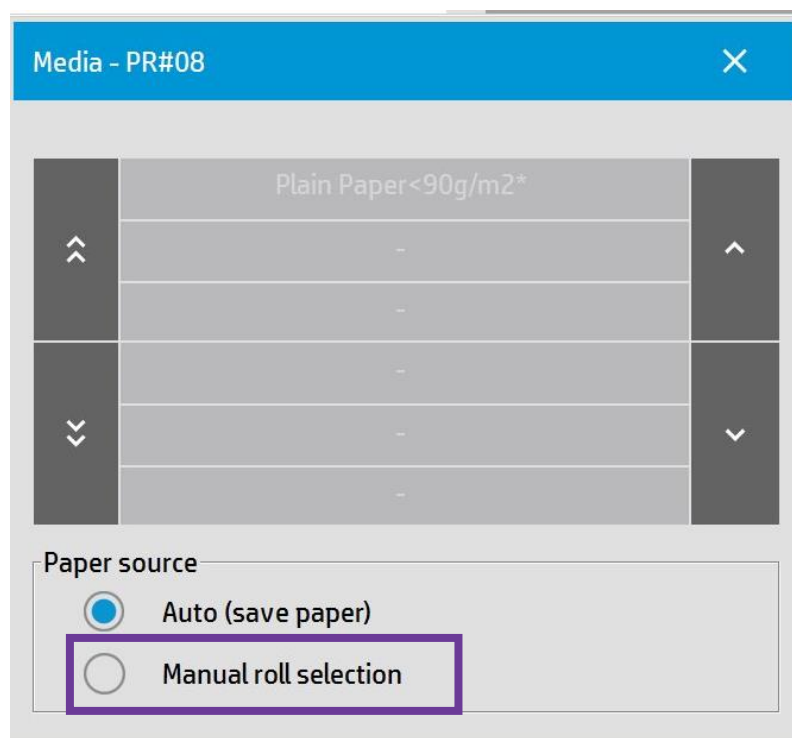

Editable PDF creation

# Manual Roll selection

Gain predictability when copying by choosing the roll where to send to print in HP PageWide XL printers

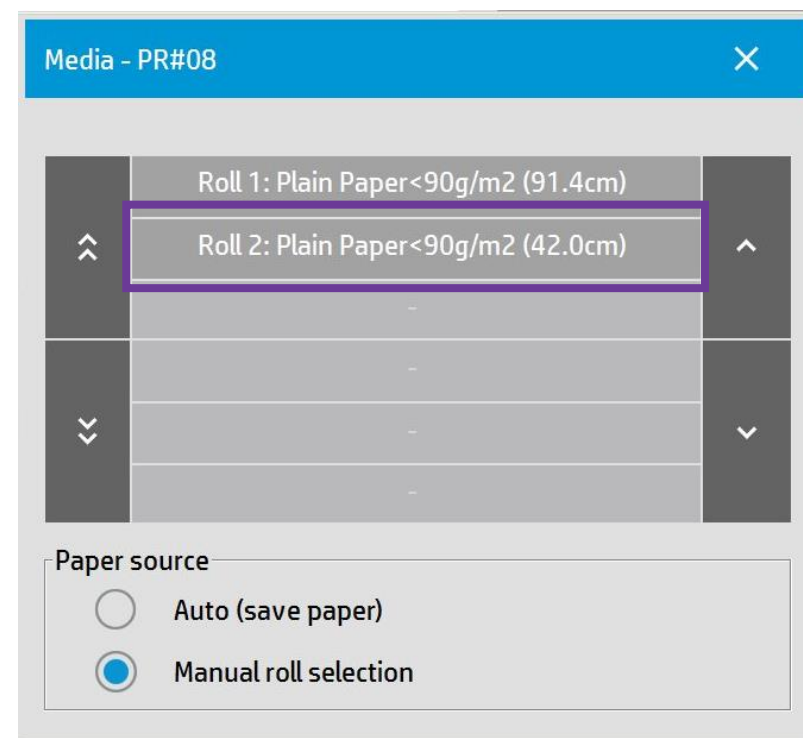

1. Click on **Paper type**

2. Select **Manual roll selection**

- Keep **Auto (save paper)** if you want the scanner to automatically select the printer to send the copy job

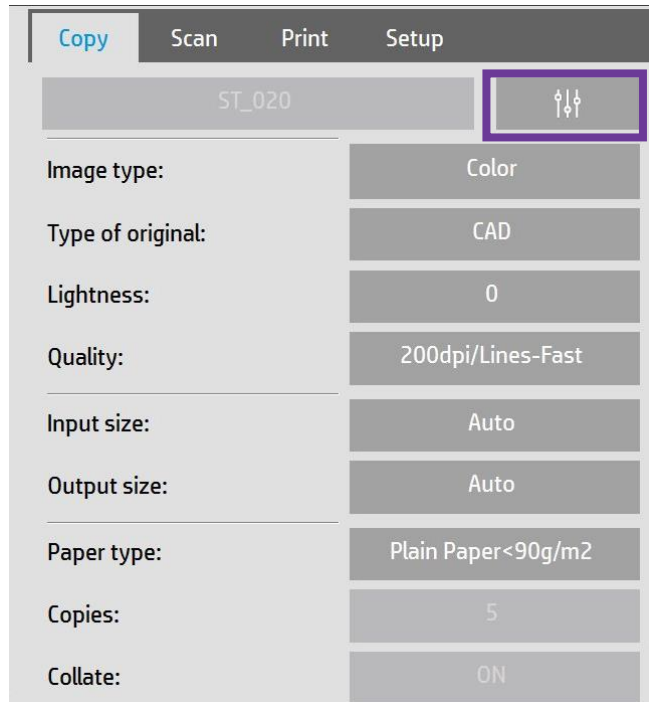

3. Select the Roll number wanted

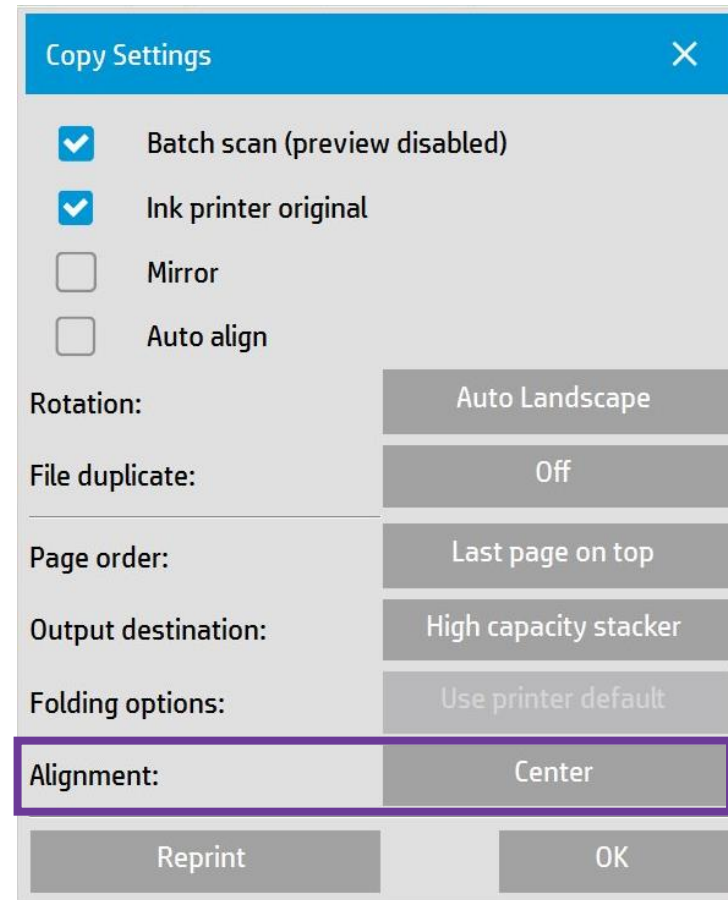

- The dropdown menu shows the Paper type and roll width of every roll loaded in the printer

# Alignment feature

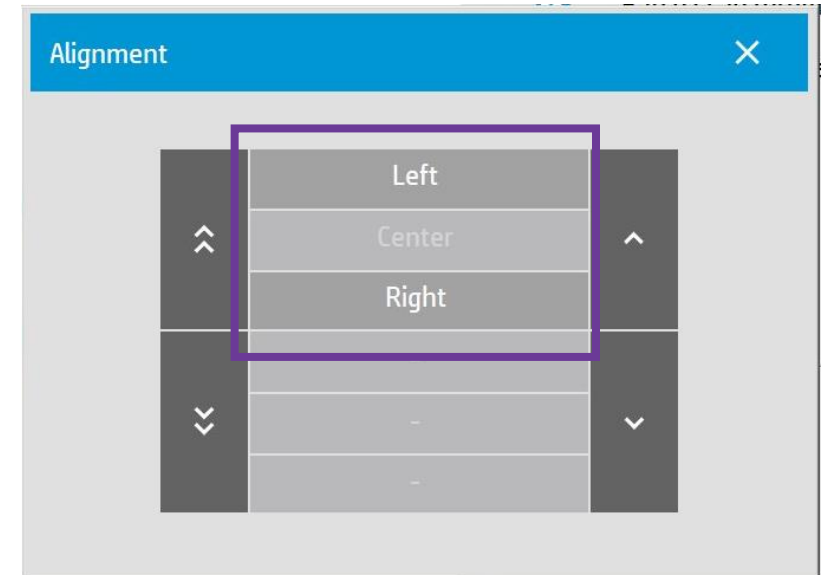

Align the image within the roll to the most suitable position and ensure copies are ideally printed and even folded

1. Click on the Advanced Copy Settings button:

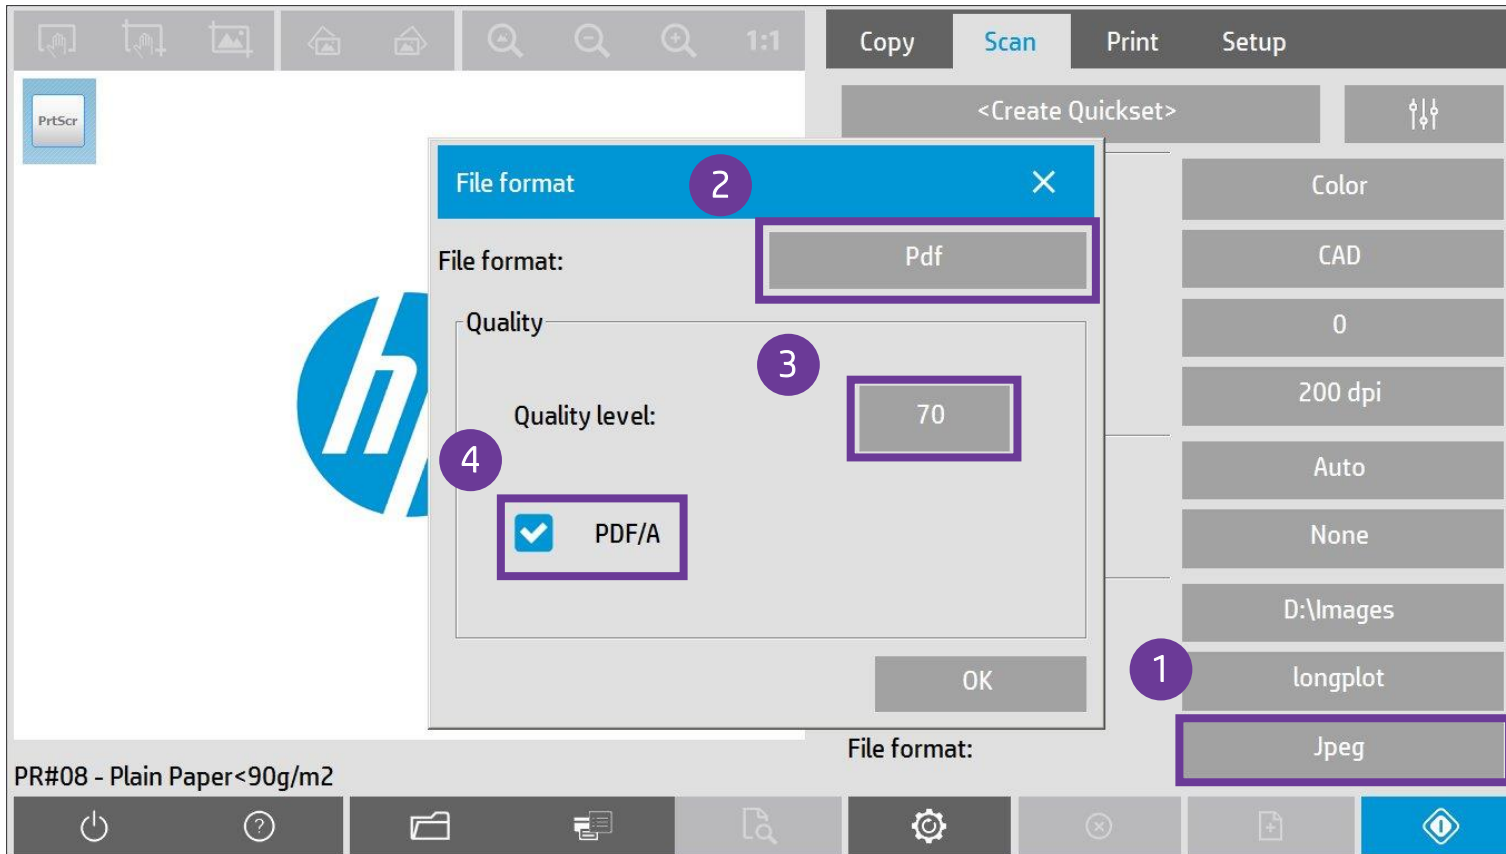

2. Click on **Alignment**

3. Select the image justification wanted:
  - Left, Center or Right

# Editable PDF creation

Create editable PDF and make sure you can edit your PDF scans

1. Click on **File format**
2. Select **PDF** file format
3. Define the **Quality level** wanted
4. Select **PDF/A** to be able to edit the PDF once saved

# Thank you
