

With your help, we're building a better planet.

HP Sustainability by the numbers

We make sustainable goals our business.

100% renewable electricity

Commit to 100% renewable electricity in our global operations with 40% by 2020.

Zero deforestation

Achieve zero deforestation associated with HP brand paper and paper-based product packaging¹ by 2020.

Reduce GHG emissions

Reduce the greenhouse gas (GHG) emissions intensity of HP's product portfolio by 25% by 2020, compared to 2010.²

Sustainability never sleeps.

Supply chain

↓ 20%

Reduced the greenhouse gas emissions intensity of first-tier manufacturing and product transportation suppliers 20% by 2020, compared to 2010.³

📌 We achieved this industry-first goal six years early.

Operations

↓ 20%

Reduced Scope 1 and Scope 2 greenhouse gas emissions from operations 20% by 2020, compared to 2010.⁴

📌 We achieved this industry-first goal five years early.

Products and solutions

↓ 26%

Reduced greenhouse gas emissions intensity in product portfolio⁵ (including PCs, printers, and servers) 26% through 2015, compared to 2010.⁶

Together, we're bringing used products back to life.

682 million recycled HP cartridges from 60 countries

3.3 billion recycled plastic bottles

50 million recycled plastic hangers

More than 3 billion new print cartridges

With your help, we recycle spent cartridges and other plastics to make new HP print cartridges—more than 3 billion of them to date.

80% of Original HP ink cartridges contain closed-loop recycled plastic.

100% of Original HP toner cartridges contain recycled content.

8,000 Blue Whales

Since 1987, HP has recycled more than 3.3 billion pounds of computing products, equaling the weight of more than 8,000 whales (1 blue whale : 400,000 pounds)

Trust through transparency

Perfect 10 for corporate social responsibility

scored by HP for corporate social responsibility in The Gartner Supply Chain Top 25 for 2016.⁷

<p>Carbon and water footprints First in industry to publish our complete carbon and water footprints.</p>	<p>Supplier code of conduct and supplier list First in industry to publish a supplier code of conduct and supplier list.</p>
<p>Greenhouse gas emissions reduction goals First in industry to set greenhouse gas emissions reduction goals across the value chain.</p>	<p>Standards for the treatment of student and foreign migrant workers First in industry to set leading standards for the treatment of student and foreign migrant workers.</p>

1st in industry

Recognized as one of the world's most sustainable companies

These organizations have honored HP's corporate social responsibility efforts.

Most trusted
Voted most trusted technology company by consumers⁸

Know the Chain
Recognized as the industry leader for commitment to address human trafficking and forced labor in supply chain

Visit hp.com/recycle to recycle any brand of computer equipment or HP cartridges today. Read our 2015 Sustainability Report at hp.com/sustainability.

1. Packaging is the box that comes with the product and all paper (including packaging and materials) inside the box. 2. Emissions intensity of HP's product portfolio refers to tonnes CO2e/net revenue arising from use of more than 95% of HP product units shipped each year, including notebooks, tablets, desktops, mobile computing devices, and workstations; and HP Inkjet, HP LaserJet, and DesignJet printers, and scanners. Expressed as emissions generated per unit of output, based on anticipated usage. For personal systems products, this reflects energy consumed by each product unit during customer use. For printing products, this reflects energy and paper consumed to print each page. Through 2015, progress against this goal equaled a 17% reduction. 3. Intensity is calculated as suppliers' GHG emissions divided by Hewlett-Packard Company's annual revenue. This method normalizes performance based on business productivity. Intensity is reported as a three-year rolling average. Production supplier GHG emissions include Scope 1 and Scope 2. Data is through December 2014, the most recent year data is available. 4. The GHG Protocol Corporate Standard classifies a company's GHG emissions into three 'scopes': Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy. Scope 3 emissions are all indirect emissions (not included in scope 2) that occur in the value chain of the reporting company, including both upstream and downstream emissions. 5. Emissions intensity of the Hewlett-Packard Company product portfolio refers to tonnes CO2e/net revenue arising from use of high-volume product lines, including notebooks, tablets, desktops, mobile computing devices, and workstations; Inkjet and HP LaserJet printers; and Hewlett-Packard Company servers, including industry-standard servers, as well as Hewlett-Packard Company Moonshot and Hewlett-Packard Company Apollo. 6. Expressed as emissions generated per unit of output. Reflective of the Hewlett-Packard Company product portfolio prior to separation. Calculations for personal systems are based on energy use—measured as emissions per unit (a single device). Calculations for printers include energy use, paper, ink, and toner cartridges—measured as emissions per unit (a single device). Calculations for servers are based on energy use, measured as emissions per unit of work (a task performed by the system, as defined by industry standards). 7.
