OMEN X by HP Full Tower Case 900-000na

Load it. Earn glory.

Finally, a full tower gaming case made for gamers, by gamers - everything from the unique diamond-shaped form, to the chambered interior was engineered with deliberate purpose. The result? Innovative cooling, easy configurability, and convenient cable management. Because champions aren't born. They're built.

BUILD YOUR LEGACY
What's inside matters. That's why we engineered a case that makes building easy, with an angled design for comfortable internal access, four storage bays accessible without tools, and compatibility with all industry standard components.

STAY COOL. GAME ON.
Without proper cooling, top tier performance never reaches its full potential. Three distinct chambers separate and cool the hottest components with their own vents and fans, while the stand lifts the tower to help cool air get pulled in.[1]

LIGHT UP YOUR GAME
Nine lighting zones accentuate the aggressive lines and smooth black finish of this unique galvanized steel case. And with downloadable OMEN Control software, you have complete control over how and when it lights up.

[1] Optional liquid cooling sold separately and not included on all models.
