

# OMEN Desktop 880-000nx

## UNLEASH ABSOLUTE FURY

Going from average gamer to gaming legend takes power that doesn't call for reinforcements. The OMEN Desktop is geared with a cutting-edge design, the industry's latest hardware, and easy upgradability to crush the latest AAA titles, and give you the top-tier performance competition demands.

### Geared for the end-game

Holding the objective takes relentless force. That's why the OMEN Desktop can wield up top dual NVIDIA® or AMD graphics and the latest Intel® processor<sup>1</sup>, unlocked for overclocking<sup>2</sup>, so you can send opponents back to their respawn.

### Stay cool under pressure

All-around edge vents, two 120 mm fans, and liquid cooling help ensure when you're on fire in-game, your desktop won't become a molten core. Top that off with a machine-like design and at-the-ready carrying handle, and it's game over.

### Levels up with you

Soaring up the leaderboards takes a machine that climbs with you. The OMEN Desktop is geared for easy upgradability with a tool-less door for quick access and maintenance, and up to four 3.5" hard drive bays (on select models).

<sup>1</sup> Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Numbering is not a measurement of clock speed. <sup>2</sup> Unlocked Intel® Core™ processors (K series) and unlocked AMD Ryzen processors on select skus only. Altering clock frequency and/or voltage may: (i) reduce system stability and useful life of the system, processor, and other system components; (ii) cause the processor and other system components to fail; (iii) cause reductions in system performance; (iv) cause additional heat or other damage; and (v) affect system data integrity. HP, Intel, and AMD have not tested, and do not warrant, the operation of the processor beyond its specifications. HP, Intel, and AMD assume no responsibility for the operation of other system components beyond their industry standard specifications. HP, Intel, and AMD assume no responsibility for the processor and other system components, including if used with altered clock frequencies and/or voltages, will be fit for any particular purpose.
