THE NEW
BUSINESS
EXPERIENCE

SAMSUNG.
PRINTING INNOVATION.

In modern society, keeping up with technology is critical to the success of any business or the productivity of any individual. The choice of technology can be the difference between survival and leadership.

As the workplace becomes more digitized and the workforce becomes more mobile, the printer and copier device must also adapt and evolve.

Printer technology and satisfaction lags the electronics innovation most employees expect. Nor has there been any major entrant to help shake change.

Until now.

Samsung is applying its ingenuity to develop break-through printing solutions that ignite productivity. Only Samsung has the electronics expertise to design and build a printer that fits the way society works today.

Printing for the modern world has arrived.
Samsung is printing innovation.

About Samsung Electronics Co., Ltd.

Samsung Electronics Co., Ltd. is a global leader in technology, opening new possibilities for people everywhere. Through relentless innovation and discovery, we are transforming the worlds of televisions, smartphones, personal computers, printers, cameras, home appliances, LTE systems, medical devices, semiconductors and LED solutions. We employ 236,000 people across 79 countries with annual sales of US\$187.8 billion. To discover more, please visit www.samsung.com

High Performance tools for optimized scan operations

Driveve_Image, powerful scanning software, provides your company with enhanced scan capabilities that seamlessly integrate into your existing system

Take command of scan workflows.

Today's companies of all sizes require effective document scanning and processing to stay ahead of the business curve. Driveve_Image provides highly intelligent scanning software to optimize enterprise scan operations for efficient, enhanced and secure execution. Personalized profiles and automated capabilities enable one-touch automated capture, processing and distribution in a secured system. With feature-rich, customizable tools discover smart ways to enhance and seamlessly integrate scan work flows into your existing information infrastructure. And do it all with easy to use management tools for your convenience.

Highlights

- Accelerate the processing, organizing & distribution of files
- Capture and route documents and images with a single click
- Auto-generate filenames and folders
- Scan directly into existing or customized filing structures
- Automatically generate and convert text searchable documents

Finely tuned for performance and productivity.

- Accelerate the processing, filing & distribution of paper documents
- Automate the capture of key business data while eliminating error-prone manual data entry
- Find documents and build complex workflow processes in seconds
- Simultaneously update all MFPs through centralized administration
- Send images directly to your document management system

Smarter and more efficient operations minimize expenses.

- Save time and money by processing documents faster
- Eliminate document shipping costs through distributed scanning
- Reduce hardcopy document storage costs
- Automate and standardize naming
- Do more with less people

No hassle, no headache usability.

- Apply software with complete ease through the simplest, easy to use App for your MFP
- Lead MFPs and network scanners with embedded interface
- Capture and route images with a single touch
- Create workflows with three easy steps-input/processing/output
- Install, configure and deploy in hours not weeks

VERSATILE SCAN FUNCTIONALITY TO ACCELERATE PERFORMANCE

Scanner Power Tools

Keep track of scanned documents using Bates stamping which allows for any kind of text or image stamps, as well as creating personalized multi-step scan profiles. Take advantage of the Metadata feature which utilizes existing company data to index files and auto-generate filenames and folders. Clean up messy images and convert them to various formats.

Database Connector

Plug Drive_Image into any ODBC compliant database and utilize the information to automatically index files. Look up and extract relevant data from your current database such as contact information quickly from the MFP and apply it to your task at hand. Also, link to back office CRM and financial systems to always be connected for fast, efficient data support.

SharePoint Connector

Make optimal use of Microsoft Sharepoint Services through a connector module for bi-directional integration. Direct scan into existing or auto-generated filing structures for automatic indexing. Fill in customized Sharepoint fields and browse conveniently at a control panel. And easily collaborate on Sharepoint projects by converting stored documents as searchable PDF files.

Exchange / Fax Connector

Send email blasts and fax broadcasts through direct integration with Microsoft Exchange server. Have access to email addresses and fax numbers at the MFP for seamless message output to multiple fax servers and services. And do it just by clicking on the name of the group or agency you want to fax or email to. Also, Have convenient access to email through your personal Outlook account for email notifications.

OCR Module

Automatically generate text searchable electronic files from paper documents. Then, convert images to PDF, Microsoft Word, Excel and more, while keeping them safe with support for secure and encrypted PDF's including PDF/A. When necessary automatically extract specific data elements using Zonal OCR to get exactly what you want. Go back and easily find any data on any document type using regular expressions.

Barcode Module

Index documents automatically using a wide range of industry standard 1D and 2D barcodes for effortless routing or even remote verification or auditing. Configure a minimum confidence level so you know if a barcode is unreadable for quality control. You can trigger workflows based on barcode content with support for multiple, simultaneous barcode identification.

A VAST ARRAY OF POWERFUL SCANNING TOOLS

Lotus Notes / Domino Connector

Gain enterprise grade collaboration capabilities with integration to IBM Lotus Notes & Domino. Access Lotus notes address books at the MFP and email directly from your Lotus Notes & Domino account to multiple people simultaneously. Email scanned documents for filing and access through the Lotus Notes and Domino server and do it all simply at your scanning device.

Digital Rights Management

Control access to confidential documents through customized authorization settings for viewing, editing, printing and copying files. Track content forwarded to internal and external recipients to ensure documents get into the right hands wherever they are. For convenience set preferences for email notifications to constantly keep track of your messages.

Compatible H / W models

Category	Product line	Model name
A3 Device	Color Multifunction Printer	CLX-9201/9251/9301NA, CLX-9250/9350ND, CLX-9252/9352NA
	Mono Multifunction Printer	SCX-8128NX, SCX-8030/8040ND
A4 Device	Color Multifunction Printer	CLX-8385NX, CLX-8640/8650ND
	Mono Multifunction Printer	SCX-5835NX, SCX-6545/6555NX
