LEGAL AND ADDITIONAL INFORMATION

SMARTIFY
YOUR BUSINESS.
PRINTING INNOVATION.

In modern society, keeping up with technology is critical to the success of any business or the productivity of any individual. The choice of technology can be the difference between survival and leadership.

As the workplace becomes more digitized and the workforce becomes more mobile, printer and copier devices must also adapt and evolve.

Printer technology and satisfaction lag the electronics innovation most employees expect. Nor has there been any major entrant to help shake change.

Until now.

Samsung is applying its ingenuity to develop breakthrough printing solutions that ignite productivity. Only Samsung has the electronics expertise to design and build a printer that fits the way society works today.

Printing for the modern world has arrived.

Samsung is printing innovation.

SAMSUNG

BACKGROUND

Modern small offices or home offices (SOHOs) need a mobile printing solution that works as flexibly as they do. Busy SOHO users need go-anywhere printing that offers easy connection, quality and the latest in mobile technology for superior business mobility. Similarly, service providers of mobile guest printing seek a simplified mobile printing method that satisfies guests while reducing time spent by staff helping guests print.

SOLUTION BENEFITS

Samsung Cloud Print™ Public offers SOHO users convenient, high-quality mobile printing with simple service setup. Cloud technology simplifies connection from anywhere for advanced on-the-go printing.

Now with Samsung Cloud Print Public, service owners such as hotels and airports no longer need to spend excess time showing guests how to print. Instead, Bring Your Own Device (BYOD) support allows guests to print easily from their own mobile devices. Combined with separate pay-for-print billing, free Samsung Cloud Print allows owners to generate a new revenue stream through guest printing.

Usage Scenario

SOHO users can print quality documents easily from anywhere, regardless of location and without a PC.

On the go
Users send urgent print jobs to the office printer while en route to work.

Without a PC
Users easily print documents from home or office without a PC.

Sharing the moment
Users send family pictures to a faraway relative's home printer.

Service owners can meet guest requirements for hassle-free public mobile printing while generating revenue with the integration of a separate pay-for-print billing service.

Hotel, airport
Guests easily print from a smartphone at the business center without staff help.

School, library
Students print/scan handouts from anywhere, with set page limits for less waste.

Law firm, public office
Civil petitioners pay to print public documents from a smartphone, without a PC.

Feature

Hassle-free connection
With Samsung Cloud Print Public, device-to-printer connection has never been easier. Now users can easily register the printers to the cloud with their smartphone, using near-field communication (NFC). Also, they can register the printers using Wi-Fi, QR code or a MAC address.

Business-quality printing
Samsung's cloud printing solution renders processes via a cloud server that works much the way a PC works. As a result, print quality is virtually the same as with a PC.

Print option control with cloud preview
Cloud preview and a print option control enable users to efficiently fine-tune print output to remove needless text, images or pages. Plus, simple editing functions, such as image rotation, help further refine printouts.

Scan-to-cloud convenience
Users can scan to the cloud and share documents seamlessly using any Samsung Cloud Print-enabled multifunction printer (MFP). After scanning, users can choose to send the scanned file directly to the phone or to cloud storage.

Simple phone number service sign-up
Registering for Samsung Cloud Print Public service is easy: just download the Samsung Cloud Print app, authenticate the phone number and sign-up is complete.

Solution Portfolio

Samsung offers a range of server-less, server-based and cloud-based printing solutions to satisfy each customer's specific infrastructure environment, from small and medium-sized businesses (SMBs) to large enterprises.

Server-less	Server-based	Cloud-based
BUSINESS CORE™ **SMART UX**	**BUSINESS PRO™**	**BUSINESS CLOUD**

Samsung offers Samsung Cloud Print Public for professional printing regardless of location, and the Samsung Mobile Print app for casual document printing, such as photos on smartphones.

Also, Samsung provides an enhanced cloud-based printing solution for small and medium-sized businesses (SMBs) and large enterprise environments where secure printing and document management are required.
