

Benefits of MerchantSoft POS for Pharmacies

MerchantSoft Point of Sale is the industry leading Outpatient Pharmacy Point-of-Sale solution. A native touchscreen solution, MerchantSoft provides scalability, flexibility, and security that can meet the needs of smallest of Independent Pharmacy to the largest integrated hospital environment.

Enterprise solution

- Single virtual server in data center, does not require individual servers in each pharmacy
- Browser based access to MerchantSoft Enterprise
- Enterprise-wide reporting
- Financial and administrative consolidation
- Point-of-sale administration from a single interface
- HIPAA and HiTech compliant auditing
- LDAP/SLDAP integration

Point-of-Sale

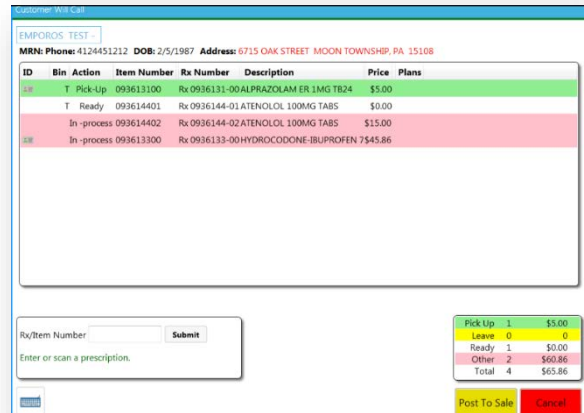

- Native, real-time touchscreen integrated solution
- Fully customizable screen and button layout
- Flexible configuration allows for real-time updates of POS layouts
- SIGIS integration for acceptance of benefit cards
- Emporos is a certified Third Party Servicer (TPS) with SIGIS
 - IIAS (inventory information approval system) System
 - QHP (qualified healthcare products) items flagged
 - Automated QHP updates
 - FSA auto-substantiation for patients, no need for claims submittal following purchase
- Real time Integration with Appriss / NPLeX
 - Quick transaction with Pseudoephedrine purchases
 - Scan driver's license barcode to auto-populate required fields
 - Interface checks limits for purchase
 - Reports to state
- Single signature for Rx, counseling, HIPAA, credit card purchase

- Prompt for counseling where required
- Driver's license scanning for C2, age requirement
- Credit Card on File (CCOF) functionality for future use of credit card token

McKesson Interface

- Two-way interface
- Queries patient accounts
- Updates patient records following transaction
- Will call show prescription status (ready, in process)
- Ensures all patient Rx's are known regardless of status
- Allows patient to decide to wait for all available Rx's vs a return visit
- Patient Safety - detects when different patient is scanned
