HP Flexworker 1.0 Service

HP

EASILY ORDER PRINT ESSENTIALS

Keep remote workers productive with seamless printing, scanning, and copying, while maintaining IT visibility, control, and favorable pricing.

What if you could ...

- Give remote workers a better, customized experience with simplified supplies and printer ordering?
- Enable your print IT department to manage supplies for your entire fleet through central billing and consolidated reporting?
- Save costs by letting users purchase supplies via a corporate price list?

Meeting the needs of the evolving workplace

Where work happens has changed. What hasn't changed is that at-home workers need to print.

This can be costly for IT. Even if your remote employees already have printers, you don't have visibility into the supplies they are purchasing, and you can't take advantage of the cost savings available with contracted supply rates.

Add the HP Flexworker Service to your HP Managed Print Services (MPS) contract so that the supplies your remote workers order are visible and included under your contract.

Benefits for your organization

The HP Flexworker Service offers a complete, consistent, and globally available HP MPS service with the following advantages:

SIMPLIFIED EXPERIENCE
Give your remote workers a better and more convenient experience with simplified ordering.

BETTER CONTROL
Get better visibility and control over supplies, printer, and HP CarePack purchasing for your flexworkers. Your print IT department can manage supplies for your entire fleet through central billing and consolidated reporting.

COST SAVINGS
Enable remote employees to purchase Original Equipment Manufacturer (OEM) supplies at your MPS-contracted rates. You'll save costs and manage spending by letting users purchase these items at corporate prices, and accounting will save time by no longer having to process reimbursement requests.

HIGHER PRODUCTIVITY
Employees no longer need to spend time searching for and purchasing their own printers or the correct ink/toner SKU for their printer. Instead, they can focus on business-critical activities.
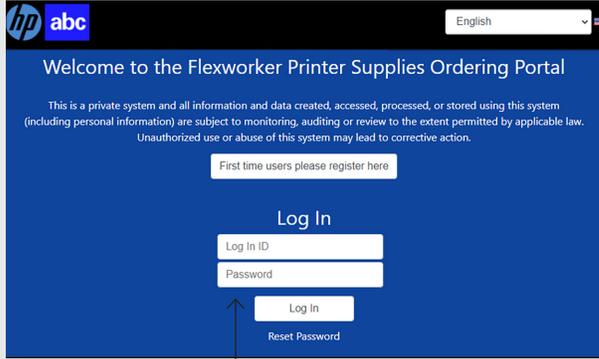

Benefits for flexworkers

Remote workers will enjoy the convenient supplies ordering options available through your HP MPS contract and appreciate no longer having to travel to the store or spend time online searching for the right type of supplies or printer. What's more, they won't need to worry about filling out and submitting expense reports for reimbursement.
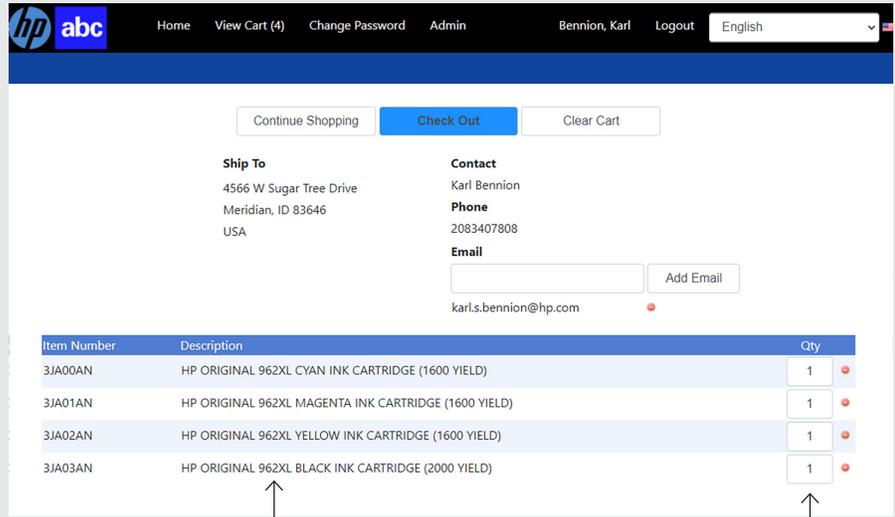

Customized portal

The HP Flexworker Service includes a simple-to-use portal for your employees. This customizable portal provides users with their own unique login that shows only their printers. That means they'll see the specific supplies and correct model numbers, without searching through hundreds of supplies or having to remember SKUs—making it quick and easy for them to order exactly what they need.

Customize the portal to your specifications—including your corporate logo

Provide users with a unique login showing only their printers

Show specific supplies and correct model numbers—so users won't need to search through hundreds of supplies or remember SKUs

Make it quick and easy for them to order exactly what they need
