Dynamic Configuration Service

Save time and money when deploying new PCs

Directly control the customization of your new PCs in real-time—right before they ship.

New PCs—exactly the way you want them

Rolling out new PCs is a complicated, time-consuming process for many organizations. Ideally, you'd like to experience real-time configuration of your devices just prior to shipment, ensuring they reflect the latest and greatest requirements before they arrive on-site. Now you can take control of the configuration process using your system management tool of choice with HP Dynamic Configuration Service.

Dynamic Configuration allows you to extend your imaging environment into HP's factories or staging centers through a secure VPN connection—so you'll be able to directly control key configuration activities for your new PCs just before shipment, including images, applications, domain join, HDD encryption, BIOS settings, and end-user device personalization.

Your new PCs will be completely configured before leaving the factory, including:

Images

HDD encryption

Applications

BIOS settings

Domain join

Unit personalization device

SECURELY CONNECT AND CONTROL

Oversee the entire configuration process by extending your imaging environment into HP's factories or staging centers through a secure connection.

- Use the deployment tool of your choice (e.g., Microsoft SCCM, Symantec Altiris, Ivanti, MDT) to personally oversee a zero-touch, automated configuration process

- Connect to a dedicated server inside HP's facilities so you can utilize customized task sequences to configure your devices while they're still at the factory

- Rely on an HP Dynamic Configuration Service technical expert who will guide you through the process

UNIQUELY CONFIGURE EACH PC

Customize each PC to fit end-user needs by using your own task sequences.

- Enjoy the most up-to-date images, applications, and settings with real-time dynamic configuration just before shipment

- HP's command center will oversee all aspects of the configuration process and provide an optimized and automated process

LEVERAGE HP'S GLOBAL REACH

With Dynamic Configuration capabilities available in all regions, your global PC deployments will be much simpler and more efficient.

SPEED UP THE DEPLOYMENT PROCESS

After configuration, your new PCs will ship directly to your location—just plug them in and get to work.

- Get employees up and running faster with new PCs that are already customized to their end users' unique needs when they arrive

- Free up your IT team by reducing the time they spend planning, preparing, and deploying PCs since they will be configured and ready to go out of the box

STAY IN CONTROL

Supporting HP commercial products, Dynamic Configuration Service is available worldwide and is used by many large enterprises across a variety of industries.

Dynamic Configuration Service makes it possible for you to provide employees with PCs that meet their individual needs without wasting valuable time and resources on a long, tedious deployment process. The efficient, secure control you have over the real-time configuration of your devices will ensure that you get exactly what you need to meet the demands of your business.
