

The Remote Workforce Is Calling – How Will IT Respond?

Changing demographics and evolving expectations have transformed the workplace into a modern and complex ecosystem, presenting IT with new challenges. To keep up, adaptation is essential.

The dynamic workforce

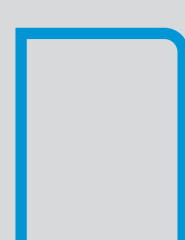

of organizations globally with more than 1,000 employees have a workforce that is made up of 30 percent or more contingent workers.¹

Blurred lines

of companies in the US, UK and Germany reported more than 5000 non-business devices connecting to their network every day.²

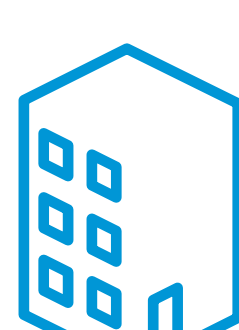

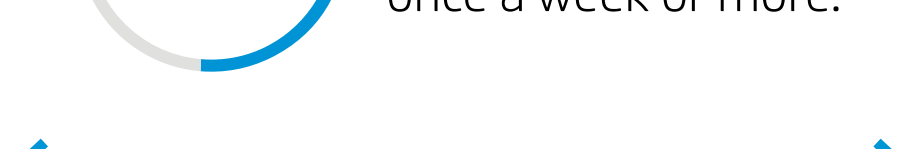

of people use smartphones to check in with work outside of official working hours.³

Remote control

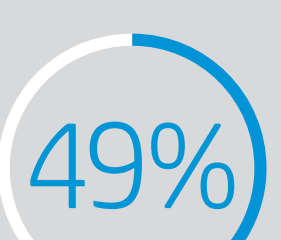

of employees globally now work remotely once a week or more.⁴

Step up and stay secure

of security breaches come from deliberate employee misuse of devices.⁵

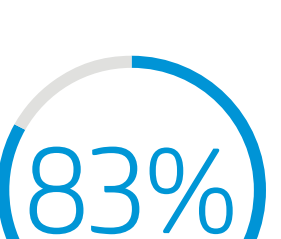

of malware gains access via employee email.⁵

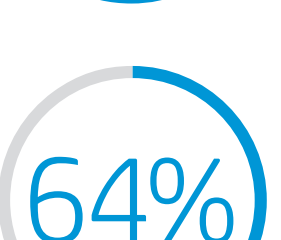

A solution for a modern workforce

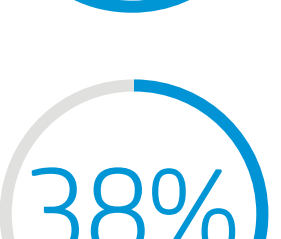

As workplaces become less centralized and more complex, a Device as a Service (DaaS) model can support IT departments to stay on top of device management and optimization.

of current adopters say DaaS reduced their costs. In total, adopters averaged 22% cost savings per device.

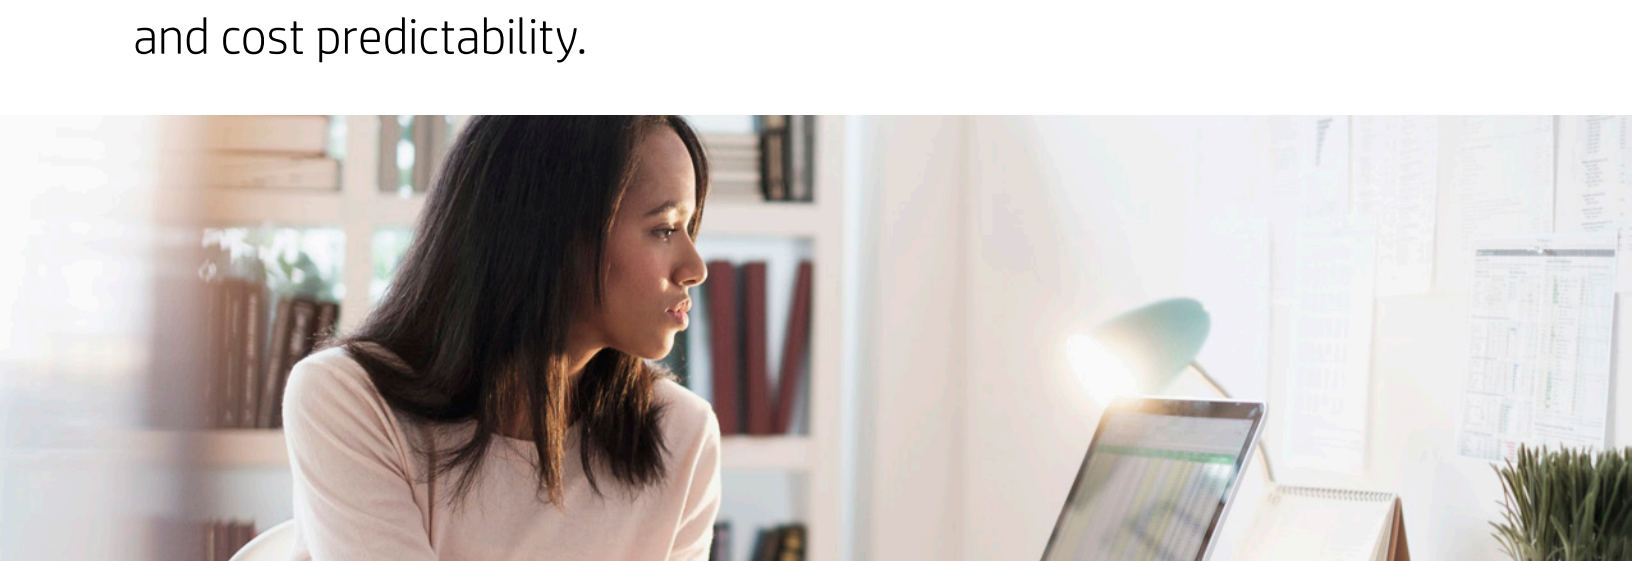

of DaaS adopters say their DaaS implementation has lessened the burden on IT.⁶

of DaaS adopters said the ability to meet the changing device needs or preferences of users was the biggest impact of their implementation.⁶

HP DaaS delivers a modern service model that simplifies how organizations source, support, and manage IT with insightful analytics and reports from HP TechPulse. With DaaS, HP partners with customers to increase user productivity, operational efficiency, and cost predictability.
