## Biography

# Boris Balacheff

## HP Fellow & VP - HP Security Lab

---

Boris Balacheff is Chief Technologist for System Security Research and Innovation in HP's CTO office. He leads the security research agenda for HP Labs' and drives pan-HP security technology strategy in lockstep with HP's Global Business Units.

With more than twenty years of experience in the fields of device and infrastructure security research, Boris has consistently championed cybersecurity innovation for a safer digital future. Today, he leads the HP Labs Security Lab research agenda, focusing on designing security from the hardware-up to help manage cyber-resilience in current and emerging IT systems; from today's PCs and Printing eco-systems, to tomorrow's cyber-physical world, such as the internet of all things or future 3D-enabled digital manufacturing ecosystems.

Boris works across HP to help shape technology strategy and directions. He sits on HP's security advisory board, and works with customers and partners to analyze the threat landscape and steer HP innovation. He has a long history of contribution and leadership to industry standards and academic collaborations. Boris currently represents HP on the Board of Directors of the Trusted Computing Group (TCG) and chairs its Certification Program Committee.

A named inventor on over 40 US patents, Boris Balacheff joined HP Labs with a French Diplôme d'Ingénieur degree from ISIMA, a French engineering school in Applied Mathematics and Computer Science.
