

Driving the Future with CATIA and HP Z Workstations

This year's COE Annual PLM Conference & TechniFair gave you the chance to learn about the latest updates to Dassault Systèmes product suite - CATIA®, ENOVIA®, DELMIA®, SIMULIA® and 3DVIA®, and network with developers, industry experts, and other experienced product users.

Now is the time to get the most out of your CATIA software by taking that knowledge and the powerful combination of CATIA on HP Z Workstations to make it all work together.

Why It All Works

HP Z Workstations are engineered to help you work faster, design smarter, and unleash your creativity like never before. With award-winning industrial designs, robust management tools, professional graphics from NVIDIA, and tool-free serviceability that allows for easy maintenance and upgrades, HP Z Workstations take innovation, performance, and reliability to a whole new level.

These systems also offer personal productivity tools that help you get your job done more efficiently. These include [HP Performance Advisor software](#), which keeps your system performing at its peak potential, and [HP Remote Graphics Software](#), which allows you to access and share your HP Z Workstations with colleagues across geographies in real-time. And you can improve your work capabilities using [high-resolution Z Displays](#) to see your designs in vivid detail and use [HP Designjet ePrinters](#) for your high-quality technical drawings.

All HP Z Workstation processors, graphics cards, memory, operating systems, and other system components are tested and optimized to deliver a better experience. And HP Z Workstations are certified for CATIA-helping ensure that you can deliver your CATIA 3D CAD projects-including part and assembly modeling, simulation and analysis, and photorealistic renderings and animations-in less time.
